Engineering and Engineering Technology

Guidelines for Promotion and Tenure

January 21, 2020
Kennesaw State University
Academic Affairs

Approval Form for College Promotion and Tenure Guidelines

A copy of this form, completed, must be attached as a cover sheet to the College guidelines.

I confirm that the attached guidelines, dated January 21, 2020, were approved by the faculty of the Southern Polytechnic College of Engineering and Engineering Technology in accordance with college bylaws:

College Faculty Council Approval – I approve the attached guidelines:

Christina Scherrer [Signature] 1/24/20
Name (printed or typed) / CFC chair

College P&T Review Committee Approval - I approve the attached guidelines:

John F. Sweigart [Signature] 1/30/20
Name (printed or typed) / Committee chair

College Dean Approval - I approve the attached guidelines:

[Signature] 1/31/20
Name (printed or typed)

Provost Approval - I approve the attached guidelines:

[Signature] 3/9/2020
Name (printed or typed)

Approved by CFC Jan 21, 2020
I. Introduction

The Southern Polytechnic College of Engineering and Engineering Technology is a unit at Kennesaw State University. The College will be recognized as a collaborative, collegial and diverse group of scholars who value excellence in teaching and mentorship, who are active in campus leadership, and who are successful in research activities that may involve both undergraduate and graduate students.

The work of a university faculty member at Kennesaw State University involves many different facets that include the three areas of: 1) Teaching, Supervising, and Mentoring; 2) Scholarship and Creative Activity; and 3) Professional Service. We believe that individual faculty should develop goals that reflect their unique ways of contributing to the university and departmental goals. These goals are developed and evaluated each year in the Faculty Performance Agreement (FPA) and Annual Review Document (ARD) process and serve to support the faculty member in his/her annual evaluations as well as in tenure, promotion, and post-tenure review (TPPTR) decisions. This document is designed to provide guidance with respect to the standards of performance expected by the Southern Polytechnic College of Engineering and Engineering Technology in each of the areas.

II. Alignment of the Southern Polytechnic College of Engineering and Engineering Technology with the University and College Strategic Plan, Mission, and Faculty Performance Guidelines

The Southern Polytechnic College of Engineering and Engineering Technology is committed to achieving the Mission and Strategic Plans of the college and Kennesaw State University. The guidelines published here are intended to support and elaborate on the guidelines for tenure, promotion, and post-tenure review of Kennesaw State University, as applied to faculty in the Southern Polytechnic College of Engineering and Engineering Technology. Each faculty member should carefully consider all guidelines for portfolio preparation and review at the university, college, and departmental levels as she or he establishes goals and prepares for the annual review or tenure and promotion application.

The Southern Polytechnic College of Engineering and Engineering Technology acknowledges and supports the Resolution on the primacy of Departmental Promotion and Tenure (P&T) Guidelines approved by the Faculty Senate (approved by the Faculty Senate, April 9, 2007), which includes the following:

1. Department P&T Guidelines that have undergone approval at all levels (department, college, dean, and provost) are in essence an understanding between the faculty member and the university.

2. Reviews of P&T portfolios at each level (department P&T committee, department chair, dean, provost, and if need be, college P&T committee) shall be based upon the criteria spelled out in the department P&T guidelines, or in
the case of joint appointments the criteria spelled out in the joint appointment agreement.

3. Letters written in review of P&T portfolios at each level (department P&T committee, department chair, dean, provost, and if need be, college P&T committee) shall make specific and detailed reference to the current department P&T guidelines in justifying the P&T decisions made by that committee or individual.

III. General Guidelines for Faculty Performance

Faculty performance in the Southern Polytechnic College of Engineering and Engineering Technology is evaluated following the general guidelines established in the University guidelines. The key points of these general guidelines are:

- The Faculty Performance Agreement;
- The Annual Review Document;
- Department responsibilities to provide resources for teaching, research, and service; and the faculty member's responsibilities for funding and professional development;
- Definitions of scholarly activity and scholarship;
- Participation in approved teacher preparation efforts and in school improvement;
- According to the KSU Faculty Handbook (3.4. Evaluation of the Quality and Significance of Faculty Scholarly Accomplishments), “Quality and significance are the primary criteria for evaluating faculty performance. Quality and significance of scholarly work are over-arching, integrative concepts that apply equally to all areas of faculty performance. A consistently high quality of scholarly work, and its promise for future exemplary scholarly work, is more important than the quantity of the work done.”

IV. Guidelines for each area of review for faculty performance

The College of Engineering and Engineering Technology recognizes the criteria for promotion and tenure as outlined in the KSU Faculty Handbook (3.5 General Expectations for Tenure, Promotion and Post-tenure Review). Evidence for consideration of promotion and tenure should be referenced according to the three categories of evaluation identified under KSU Faculty Handbook, Section 3.3, Basic Categories of Faculty Performance. The categories are as follows:

1. Teaching, Supervision, and Mentoring,
2. Research and Creative Activity, and
3. Professional Service.

A. Teaching, Supervision, and Mentoring
As stated in the University guidelines, teaching and mentoring effectiveness is considered to be fundamentally essential for continued faculty employment, tenure, and promotion in
rank. In the Southern Polytechnic College of Engineering and Engineering Technology, teaching, supervision and mentoring activities may include but are not limited to:

- High quality teaching across a variety of instructional settings (classroom, instructional laboratory, online, seminar, directed study, tutorials, undergraduate research and scholarship, etc.),
- Incorporating effective research based pedagogical methods into classes,
- Developing new or innovative teaching methods,
- Developing new or innovative instructional materials,
- Assisting and/or evaluating course and/or student learning outcomes,
- Professional student mentoring for our degree programs, graduate school, and career,
- Supervising undergraduate and/or graduate students in research and scholarship,
- Curricular development, modification, implementation and evaluation.

Evaluation of a faculty member's teaching, supervision and mentoring effectiveness may include student written evaluations, faculty's evidence and description of innovative teaching techniques, peer reviews, and other independent evidence as suggested in the following areas: a) effectively plans and organizes subject matter of courses assigned, b) utilizes effective teaching and instructional assessment methods to better understand and to further improve teaching effectiveness and student learning, c) functions effectively in mentoring students, d) serves as an effective supervisor of student research, and/or e) expands his or her knowledge/skills to improve effectiveness as an on-going activity to further the instructional capabilities of the department. Each course is evaluated by students at the end of fall or spring semester and is initiated by the faculty member according to university policy.

B. Scholarship and Creative Activity

The Southern Polytechnic College of Engineering and Engineering Technology recognizes a process of research that includes idea generation, identification of necessary resources, gathering and analyzing data, and disseminating the results at professional meetings and in published formats. All aspects of this process are considered necessary scholarly activity. Scholarship, however, is defined specifically as a creative, intellectual work that is disseminated and professionally reviewed by peers in the discipline. This may include research based on the faculty member's training and expertise ('disciplinary-based research'), teaching and learning-based research, or other appropriate efforts as defined in the Faculty Performance Agreement. The pace of research is acknowledged to vary among the subdisciplines within engineering, especially those subdisciplines that require long periods of time for significant data collection.

Scholarly activity in research and creative activity may include, but is not limited to:

- Establishing an active, sustainable, data generating, research program,
- Mentoring undergraduate or graduate students in directed study projects, thesis projects, or related research mentorships,
- Supervising masters and/or honors theses,
• Establishing collaborative relationships within the department, college, or university and/or with colleagues at other institutions,
• Grant development for external and internal awards,
• Evaluating effective student learning and pedagogical innovation.

Teaching activities may be considered scholarship when tangible and disseminated results are produced. Examples include:

• Dissemination of results in peer-reviewed scientific and/or professional journals, monographs, book chapters, on-line reviewed publications, technical reports, etc.,
• Professionally reviewed presentations at conferences, consortia, seminars, etc.,
• The development and dissemination of innovative materials and programs for K-12 teachers and their students, such as those activities produced from Teacher Quality Grants,
• Externally funded grants,
• Textbooks, laboratory manuals, and similar published materials are considered scholarship if they have been externally reviewed.

Research rises to the level of scholarship when it becomes disseminated and professionally reviewed. Scholarship includes, but is not limited to:

• Discovery or applied research activities disseminated in reviewed scientific and professionally based journals, monographs, book chapters, conference proceedings, on-line reviewed publications, etc.,
• Industrial research leading to patents, presentations, white papers or publications in refereed journals. If non-disclosure agreement prevents dissemination of results, a support letter from the company describing the innovative work done may be submitted,
• Publication and dissemination of research in technical reports written for governmental agencies if the report is peer-reviewed by other professionals in the field,
• Publication of peer-reviewed textbooks and peer-reviewed articles,
• Presentations at professional conferences, consortia, seminars, etc. including any presentations produced from student mentorship,
• Submission and/or award of internally and externally funded research grants. In considering grant awards, consideration is given to the degree of competitiveness of the program or the funding organization.

Evaluation of a faculty member’s research effectiveness will be based upon the evidence that the individual faculty member has systematic inquiry activities and should: a) encompass notable levels of discipline expertise, b) be innovative or logically contribute to the discipline or professional knowledge base, c) be replicable or elaborated, d) be documented and peer reviewed. Within the Southern Polytechnic College of Engineering and Engineering Technology, it is recognized that the faculty represent very diverse disciplines/subdisciplines. When evaluating faculty from such a range of disciplines, difference in the time required for establishing a research program, data collection, and analysis must be taken into account.
C. Professional Service

Professional service involves the application of a faculty member's academic and professional skills and knowledge to the completion of tasks which benefit or support individuals and/or groups in the institution, the University System, professional associations, or external communities at the local, state, regional, national, or international levels. In the Southern Polytechnic College of Engineering and Engineering Technology, faculty professional service activities include, but are not limited to:

- Chairing, co-chairing, and/or active participation in university, college, or departmental level activities, committees, faculty governance bodies, task forces, etc.,
- Leadership positions and/or significant achievements in activities among professional organizations at the international, national, regional, and state level (boards, standing committees, ad hoc committees, task forces, etc.),
- Leadership and/or consulting/advising among a broad base of relevant community, state, regional, or national organizations, agencies, schools, or businesses,
- Working on outreach to schools (elementary, middle or high schools) and to community colleges, including presentations at schools, teacher workshops, judging science fairs, working with the Science Bowl and Science Olympiad, etc.,
- Serving as an official faculty mentor for new faculty that is assigned by the department or college,
- Developing and/or maintaining departmental, college, or university documents such as the part-time faculty handbook, program brochures, departmental web pages, etc.,
- Instrument supervision and maintenance,
- Coordinating laboratories or courses,
- Providing Service work to industry not leading to scholarly publications,
- Leadership (faculty sponsor/advisor) in student-based professional clubs, honor societies, etc.,
- Promotional and recruiting activities for department, college, and/or university,
- Professional review of external accreditation reports, folios, or self-studies,
- Editorships/reviewer board membership of professional journals or scholarly books/monographs,
- Professional review of journal articles, books, etc.,
- Accreditation self-study development, planning, assessment,
- Other service duties that are mutually agreed upon by the faculty member and the department chair that are not assignable to other areas,
- Grant writing for support of student activities, student groups, or coursework.

Professional service activities will be evaluated based upon the nature and extent to which the individual applies professional expertise at: a) the University community in support of teaching, service, and research functions, b) the local, state, regional, national, or international professional organizations, and c) to community and/or non-profit organizations, governmental groups, or private business/agencies whose missions align with this department, college and university.
Service activities may be considered scholarship when tangible, disseminated, and peer-reviewed results are produced. Scholarship of service is distinguished from routine service work by the significance and scope of the leadership and the products produced by the activity. Examples include:

- Providing substantial leadership, resulting in significant written documentation, at the Department, College or University level,
- Leadership in professionally related state, regional, or national organizations,
- Organizing a regional, national, or international conference,
- Making significant contributions to writing institutional self-study reports, governance documents or other notable institutional documents, and
- Preparation of accreditation reports.

Professional Service may also include serving as an administrator (see KSU Faculty Handbook for definition of administrator). The service duties performed by an administrator may include activities such as:

- day-to-day operational management of the administrative unit,
- budgeting and budget reporting,
- strategic and operational planning,
- scheduling courses and events for the unit,
- supervision of faculty and staff,
- staffing functions, including screening, hiring and training employees of the unit,
- conducting performance reviews of faculty and staff,
- marketing degree programs and unit activities,
- other work assignments that are directed toward the successful operation of the administrative unit.

V. Workload Models

Consistent with the University guidelines, the College defines four workload models: Teaching Model, Teaching/Scholarship Model, Service Model, and Administrative Model.

A workload-hour is defined as one hour of lecture or two contact hours of lab. For example, a one-credit hour lab (three contact hours) is 1.5 workload-hours. A three-credit hour lecture course is three workload-hours. Three workload-hours for one semester is defined as 10% of the faculty load. A minimum of 10% of time must be allocated to service.

Teaching Model

The Teaching Model provides a professional workload model for faculty employed full-time with annual review and renewal, whose main responsibility and interests are in the teaching and supervision of students in a variety of settings. Faculty in this model will typically carry a teaching load 24-27 workload hours of class instruction per academic year. Typically, the load
teaching is the equivalent of 8 to 9 (3 credit hour lecture) courses per academic year. The overall workload of the faculty in this model will be 80 – 90% teaching, 0 – 10% scholarship and creative activity, and 10% service. Tenured or tenure-track faculty on this model will not be eligible for tenure or promotion.

It is understood that lecturers will generally be on the Teaching Model with expectations of a 5-4 teaching load. Lecturers do not have specified expectations in scholarship but may be expected to participate in student mentoring and to serve on committees. Lecturers may serve in other roles (e.g., course coordinators) as needed. Promotion and rehiring decisions will be made considering the faculty member’s success in achieving requirements of their Faculty Performance Agreement (FPA) during the evaluation period (see details in department guidelines).

The Southern Polytechnic College of Engineering and Engineering Technology follows the University’s guidelines concerning lecturers and senior lecturers:
“In most cases faculty hired as lecturers or senior lecturers have as their primary responsibility teaching, supervising, and mentoring and are therefore expected to be highly effective in these areas. Unless otherwise set forth in a Faculty Performance Agreement, there are no expectations for scholarship and their service responsibilities may be limited to the minimum necessary to successfully teach their assigned courses (e.g., attendance at relevant department meetings and participation on appropriate department committees). In many cases their responsibilities will primarily be devoted to teaching multiple sections of the same undergraduate courses. The heavy teaching load of these individuals offsets the absence of a full range of regular faculty responsibilities that normally rounds out the typical full undergraduate faculty load at KSU. Because of this, lecturers and senior lecturers are expected to demonstrate exceptional teaching ability in order to qualify for reappointment at KSU. In some cases, the responsibilities assigned to a lecturer or senior lecturer may be individualized and unique. In such cases the responsibilities should be delineated in the Faculty Performance Agreement.”

Teaching/Scholarship Model

The Teaching/Scholarship Model provides a professional option for faculty with interests and talents in the areas of teaching, research and creative activity, and possibly administrative leadership, as outlined in Section IV of this document. The model provides an opportunity for a teaching focus with a secondary emphasis in the scholarship of one of the following: teaching, service, research and creative activity, or administrative leadership. The faculty member typically will have a teaching load of 18 workload hours (Section V) of class instruction per academic year. This is typically the equivalent of 6 (3 credit-hour lecture) courses). The proportion of effort that will be placed in all workload areas will be determined by the chair, in consultation with faculty, based on departmental, College and University needs, and specified in the Faculty Performance Agreement (FPA). The criteria for scholarship will be specified by
department guidelines (e.g. making professional presentations; publishing in refereed (peer-reviewed) journals or government documents; or obtaining grant funding). This model is available for tenured or tenure-seeking faculty. The criteria for performance and evaluation will be consistent to the rank of the faculty as outlined in the department T&P guidelines.

The College guidelines for the Teaching/Scholarship Model are interpreted as follows:

- Faculty on the Teaching/Scholarship Model will typically carry a teaching load of 18 workload-hours per academic year, as defined above in Section V;
- Teaching is the primary responsibility of all faculty, and excellence in the area of Teaching, Supervision, and Mentoring is expected of all faculty;
- Each faculty member is expected to contribute in the area of Professional Service;
- Each faculty member will produce scholarship in at least one area. This could be scholarship of research and creative activity, scholarship of teaching and learning (SOTL), scholarship of service, and/or scholarship of administrative leadership;
- “Scholarship” is interpreted according to University and College guidelines, which state that “Scholarly is an adjective used to describe the processes that faculty should use within each area. In this context, scholarly refers to a cyclical process that is deliberate and intentional, systematic and planned, measured and evaluated, revised and rethought. On the other hand, scholarship is a noun used to describe tangible outcomes of the scholarly processes.”;
- Examples of scholarly activity and scholarship are listed above;
- Criteria for the Teaching/Scholarship Model are given in Table I;
- Table IV presents the interpretations and adaptation of the University’s and College’s general criteria in the Southern Polytechnic College of Engineering and Engineering Technology by Rank and for Tenure.

Service Model

The Service Model applies to Assistant Department Chairs, ABET Coordinators, Graduate Program Coordinators, and the like where service accounts for more than 20% of the workload. The typical teaching load for these faculty will vary from 12 – 18 workload hours per academic year. Selection of this model must be done with the support and written approval of the faculty member’s supervisor and the Dean of the Southern Polytechnic College of Engineering and Engineering Technology. Expectations for scholarship and service will be documented in the Faculty Performance Agreement.

Administrative Model

The Administrative Model provides an appropriate workload model for academic department chairs and other faculty, for whom the majority of their time and effort is committed to the administration of academic departments, degree programs, centers or other administrative responsibilities. The typical teaching load for these faculty will vary from 0 – 6 workload hours per semester. Selection of this model must be done with the support and written approval of the Dean of the Southern Polytechnic College of Engineering and Engineering Technology. The performance criteria for these faculty will
be the aggregate performance of the unit and/or program(s) supervised by the faculty. Faculty engaged in the Administrative Model are required to be active in multiple levels of service and to establish strong and effective leadership practices. The requirement of Teaching and Research and Creative Activity contributions will be assessed within the context of the overall needs of the administrative unit. Expectations for scholarship and service will be documented in the Faculty Performance Agreement.

This model is intended to define the contributions of department chairs and assistant/associate deans and other administrative faculty with 12-month contracts. This model requires written approval by the Dean.

VI. General Expectations of Faculty

The Southern Polytechnic College of Engineering and Engineering Technology requires a baseline of service from all faculty members. This baseline of service includes:

- attending required department, College and University meetings, seminars, and graduation;
- working effectively with colleagues on appropriate ad hoc and chartered committees;
- meeting with students and members of the community on issues related to the mission of the department and College; and
- contributing ideas and effort to improve department offerings and functions.

VII. Annual Reviews

The Southern Polytechnic College of Engineering and Engineering Technology uses five terms to define levels of achievement in the annual evaluation. The five levels are “exemplary”, “noteworthy”, “satisfactory”, “unsatisfactory”, and “unacceptable” and are defined by the Annual Faculty Evaluation Guidelines which follow.

TEACHING, SUPERVISION AND MENTORING

The following five-point rating scale is provided for guidance in the evaluation of effective teaching performance.

Unacceptable

This faculty member neglects his/her duties with such actions as frequently not meeting classes, failing to prepare adequately for classes, refusing to accept teaching assignments when requested by the department chair or does not accept the faculty role of advisor and mentor. He/she receives poor teaching evaluations and does not assess whether his/her students have met the course outcomes. A substantial number of expectations in this area as outlined on their Faculty Performance Agreement are unmet.

Unsatisfactory

This faculty member meets his/her classes but conducts them with minimal effort. He/she might not keep regular office hours nor otherwise make himself/herself

Approved by CFC Jan 21, 2020
available to students. He/she might be continuing to use the same material from year to year, thereby not keeping up with developments in the discipline. This faculty member does not use the results of the outcomes assessment process to improve their courses. This faculty member might not cooperate in the planning of courses with multiple sections. Because of such performance, he/she might not be respected by colleagues and receives mediocre teaching evaluations. This faculty member might not accept the role as faculty advisor/mentor. A number of expectations in this area as outlined on their Faculty Performance Agreement are unmet.

Satisfactory

This faculty member adequately fulfills duties in teaching and mentoring as required. He/she conducts classes, is available to students, is current in the discipline, uses a variety of teaching methods appropriate to the discipline being taught, and cooperates in departmental or college-wide teaching endeavors. This instructor is considered by his/her colleagues as a dependable member of the faculty and receives satisfactory student teaching evaluations. He/she collects and evaluates outcome data regarding student learning, and revises courses from semester to semester based on this outcome data. These revisions are made deliberately and then systematically assess the effect of the revisions on students’ learning. Over a rolling 3-year period, participate in at least one professional development activity such as attending workshops and conferences related to teaching. He/she has met the requirements of the Faculty Performance Agreement.

Noteworthy

This faculty member is imaginative and enthusiastic about teaching and mentoring, plans carefully, and carries through. His/her students find this instructor to be a stimulating classroom lecturer or leader of discussions. This teacher is very widely read in the discipline, explores new methods of teaching appropriate to the discipline being taught, continuously introduces into his/her courses the results of his/her own investigation. Both students and colleagues will recognize him as a very good teacher and receives high student evaluation scores. He/she collects and evaluates outcome data regarding student learning, and revises courses from semester to semester based on this outcome data. These revisions are made deliberately and then systematically assess the effect of the revisions on students’ learning. Over a rolling 3-year period, participate in at least one professional development activity such as attending workshops and conferences related to teaching. Continually tries to improve both the style and substance of the mentoring role by evaluating the effectiveness of his/her mentoring practices and willingly participating in advisor-training programs offered by the College for this purpose. He/she has met or exceeded the requirements of the Faculty Performance Agreement.

Exemplary

This faculty member is considered one of the best in the teaching and mentoring roles. He/she is highly imaginative, completely dependable, and in command of his/her discipline. This teacher generally receives excellent evaluations from both students and faculty. Student evaluation scores are very high. He/she collects and evaluates outcome data regarding student learning, and revises courses from semester to
semester based on this outcome data. These revisions are made deliberately and then systematically assess the effect of the revisions on students' learning. Over a rolling 3-year period, participate in two or more professional development activity such as attending workshops and conferences related to teaching. Though he/she is demanding, this instructor is compassionate in his/her relationships with students and exerts every effort to be personally supportive. This professor may supervise students in research or independent study courses. He/she is recognized by faculty as a very good mentor. Students may request this faculty member as his/her advisor. He/she has exceeded the requirements of the Faculty Performance Agreement.

RESEARCH & CREATIVE ACTIVITY

The following five-point rating scale is provided for guidance in the evaluation of creative scholarly activity.

Unacceptable

This faculty member shows no interest in his/her discipline and does not read relevant material to keep current other than that required for class preparation. A substantial number of expectations in this area as outlined on their Faculty Performance Agreement are unmet.

Unsatisfactory

This faculty member reads in his/her discipline beyond textbooks and what is required for class preparation and attends professional events such as lectures, symposia, etc. A number of expectations in this area as outlined on their Faculty Performance Agreement are unmet.

Satisfactory

This faculty member has demonstrated this year that he/she is successfully executing a plan for creative scholarly activity which includes professional development as detailed on their Faculty Performance Agreement. He/she published or has made significant progress towards the completion of a peer-reviewed publication or comparable intellectual contribution in their discipline or engineering education. For a consulting activity to be considered a comparable intellectual contribution, it must be scholarly and professional in nature. He/she has met or exceeded the requirements of the Faculty Performance Agreement.

Noteworthy

In any given year, the hallmark of this faculty member's performance is organization and consistency in setting and achieving goals for creative scholarly activity and professional development as detailed on their Faculty Performance Agreement. He/she published or has made significant progress towards the completion of multiple peer-reviewed publications, an external proposal, or comparable intellectual contributions in their discipline or engineering education. For a consulting activity to be considered a comparable intellectual contribution, it must be scholarly and professional in nature. He/she has met or exceeded the requirements of the Faculty Performance Agreement.

Exemplary

Approved by CFC Jan 21, 2020
This year this person has exceeded the standards set forth above. This faculty member's publications and creative scholarly activity make him/her respected beyond the campus in his/her field. He/she has published in quality journals, presented at a national conference and/or submitted a grant proposal to a national funding agency. His/her scholarly or creative work has been judged as being excellent by his/her professional colleagues, i.e. awarded a fellowship, awarded a research grant, etc. Also, this person continues to demonstrate a higher level of independent functioning via a well-defined creative scholarly activity thrust or recognition in a specialized creative scholarly activity area. He/she maintains professional licensure in their discipline, if applicable. He/she has exceeded the requirements of the Faculty Performance Agreement.

SERVICE

The following five-point rating scale is provided for guidance in the evaluation of professional service activities. In Annual Review Documents, simply listing service activities does not address the role played, the unique contribution made, nor the alignment between these activities and the mission of the College. The faculty member must discuss their contributions in the context of the Department or the College mission and indicate the quality and significance of their Professional Service activities.

Unacceptable

This faculty member performs University and professional service activities reluctantly and with minimum effort, participates in no professional programs, holds no offices in professional organizations, and performs no consulting work or similar activities. A substantial number of expectations in this area as outlined on their Faculty Performance Agreement are unmet.

Unsatisfactory

This faculty member serves on committees to which he/she is appointed, but makes no special effort to assist students, or the Department, College, or University. He/she frequently fails to cooperate with colleagues serving on committees. The faculty member may maintain memberships in one or more professional organizations, but is seldom involved in organizational meetings, seminars, consulting work, or similar activities. A number of expectations in this area as outlined on their Faculty Performance Agreement are unmet.

Satisfactory

This faculty member fulfills all student support activities and committee assignments effectively. He/she assists willingly in the special service needs of the Department, College, and University; serves on committees effectively; and earns the appreciation of colleagues. This person occasionally presents a continuing education training program for persons in his/her discipline and occasionally presents a civic or community training program or gives a civic or community talk related to their discipline. The faculty member occasionally serves as a paper reviewer, chair, or discussant, and occasionally performs unpaid consulting work or similar activities. He/she has met the requirements of the Faculty Performance Agreement.
Noteworthy

This faculty member is considered very effective at student support, committee work, outreach and continuing education programs. He/she is occasionally selected to serve on or to chair important committees. Through such activities, this person earns university-wide respect and recognition for their program. The faculty member is well known throughout regional/national organizations within his/her discipline. The faculty member demonstrates this level of achievement by involvement in one or more of the following activities: attends professional meetings of regional and/or national organizations and/or is frequently called upon to serve as a paper reviewer, chair, or discussant, and may serve as an officer; frequently performs unpaid consulting or training services for business groups within his/her discipline on and off campus; or similar activities. This faculty member may serve as faculty advisor to a student group. He/she volunteers at some community events, i.e. judge for local science fair, speaker at career day, etc. He/she has met or exceeded the requirements of the Faculty Performance Agreement.

Exemplary

This faculty member is highly respected throughout the campus for his/her student, committee and community work. This faculty member has distinguished himself/herself for work with students, committees, and continuing education. The faculty member may be the faculty advisor of a student competition team or organizer of a student competition. He/she may have been nominated or received a service-oriented award or served with distinction on a prestigious campus-wide committee. The faculty member has distinguished himself/herself in at least one professional organization supporting his/her discipline. The faculty member demonstrates this level of achievement in one or more of the following activities: holds regional or national office, appears on national professional programs, hosts a national or international conference, serves on editorial boards, and may occasionally serves as editor of proceedings or journals or similar activities. He/she may be called upon for important unpaid consulting or training assignments by business or industry groups. He/she has exceeded the requirements of the Faculty Performance Agreement.

VIII. Criteria for Evaluation

Criteria for the Teaching Model

Tenured or tenure-track faculty must devote at least 20% of their time to scholarship and creative activity to be tenured and/or promoted.

Faculty candidates for promotion to Senior Lecturer on the teaching model must demonstrate evidence of “noteworthy” achievement in the category of Teaching. A minimum of satisfactory must be achieved in Research and Creative Activity and/or Service if these are included in the candidates Faculty Performance Agreement.

In order to meet “Satisfactory” performance the faculty member must complete the activities appropriate to rank (Table IV) as well as the Basic Requirements as outlined below in Table I. Noteworthy or exemplary performance requires significant performance in more than one activity listed under “Activities above and beyond basic requirements.”
Criteria for the Teaching/Scholarship Model Over a Five-Year Commitment Period

Faculty candidates for tenure and/or promotion on the teaching/scholarship model must demonstrate evidence of “noteworthy” achievement in the faculty performance categories of 1) Teaching and 2) Research and Creative Activity. A minimum of “satisfactory” must be evidenced in Service.

In order to meet “Satisfactory” performance the faculty member must complete the activities appropriate to rank (Table IV) as well as the Basic Requirements as outlined below. Noteworthy or exemplary performance requires significant performance in one or more of the activities listed under “Activities above and beyond basic requirements.”

| Expectations for Service | For the Teaching/Scholarship Model, specific service requirements are as follows:

1. Basic requirements (Satisfactory):
   a. Active participation on one department, college, and/or university committee per year.
   b. Attend faculty meetings.
   c. Performance in one additional area listed under “Activities above and beyond basic requirements”

2. Activities above and beyond basic requirements:
   a. Active participation on two or more additional department, college, and/or university committees per year.
   b. Serve as laboratory or course coordinator in an assigned teaching area.
   c. Service as editor or associate editor of a professional newsletter, conference proceeding, or journal.
   d. Contribute to professionally related state, regional, or national organizations.
   e. Active participation in promotional activities and recruitment for the department, college, or university.
   f. Special outreach to schools or community colleges.
   g. Review or referee papers, books, and/or grant proposals.
   h. Advising student organizations.
   i. Leadership, such as serving as chair, on departmental, college, and/or university committees.
   j. Leading institutional and program accreditation.
   k. Other service activities agreed upon by the faculty member and the Department Chair.

| Expectations for Research and Creative Activity | All faculty on the Teaching/Scholarship model are expected to exhibit scholarly activity in the area of research and creative activity. This will often be connected with activity in the area of Scholarship, as described below.

1. Basic requirements (Satisfactory)
   a. Establish an active, sustainable, data generating, research program.

2. Activities above and beyond basic requirements:
   a. Mentor undergraduate or graduate students in directed study projects or related research mentorships.
   b. Establish collaborative relationships within the department, college, or university and with colleagues at other institutions.
   c. Grant development for external and internal awards
   d. Other activities agreed upon by the faculty member and the Department Chair.
<table>
<thead>
<tr>
<th>Expectations for Scholarship</th>
</tr>
</thead>
<tbody>
<tr>
<td>For the Teaching/Scholarship Model, faculty members are required to perform scholarship in the scholarship of teaching and learning (SOTL) and/or the scholarship of research and creative activity. Although different faculty members will have varying scholarship endeavors depending on discipline, type of scholarship, rank, and other factors, all successful scholarship is evaluated on the tangible products that result from the scholarship. The quality as well as quantity of the products of scholarship will be taken into account in the evaluation. Quality can be demonstrated by recognition of accomplishments by peers including citations, among others. Scholarship objectives will form a key part of the Faculty Performance Agreement for faculty on the Teaching/Scholarship Model.</td>
</tr>
</tbody>
</table>

1. Basic requirements (Satisfactory):
   a. Execute or continue a scholarship plan that is appropriate to the professional field and the choice of the scholarship area, as negotiated in the Faculty Performance Agreement.
   b. For scholarship of teaching or scholarship of research and creative activity, produce five products within a five year commitment period:
      i. Products include conference proceedings, peer-reviewed journal publication, patents, or submission of proposals for internally or externally funded grants or contracts, or obtaining an external grant.
      ii. Tenured or tenure-track faculty members are expected to have at least one peer reviewed journal publication by the time he/she applies for tenure and/or promotion. The publication must be dated after the arrival of the faculty member at Kennesaw State University.

2. Activities above and beyond basic requirements:
   a. For scholarship of teaching, or scholarship of research and creative activity:
      i. Obtaining internally or externally funded grants or contracts.
      ii. Publish a peer-reviewed textbook or laboratory manual.
      iii. Additional presentations (particularly those that are at the national/international level or peer reviewed, or in which the faculty member is an invited speaker).
      iv. Additional peer-reviewed publications (particularly those in high-quality journals and/or where the faculty member is the primary author).
      v. Delivery of technical reports to agencies and organizations.
   b. Other scholarship activities agreed upon by the faculty member and the Department Chair.

Criteria for the Service Model over a Five-Year Commitment Period
Faculty candidates for tenure and/or promotion on the service model must demonstrate evidence of “noteworthy” achievement in the faculty performance categories of 1) Teaching and 2) Service. A minimum of “satisfactory” must be evidenced in Scholarship.

### Criteria for the Administrative Model over a Five-Year Commitment Period

Faculty candidates for tenure and/or promotion on the administrative model must demonstrate evidence of “noteworthy” achievement in the faculty performance categories of 1) Teaching and 2) Service. A minimum of “satisfactory” must be evidenced in Scholarship.

In order to meet “Satisfactory” performance, the faculty member must complete the activities appropriate to rank (Table IV) as well as the Basic Requirements as outlined below. Noteworthy performance requires significant performance “above and beyond...
basic requirements,"

VIII. Revisions to College Guidelines

The Southern Polytechnic College of Engineering and Engineering Technology Faculty Council shall periodically review the College Guidelines and make recommendations to the Dean regarding needed revisions. Revisions to the Guidelines shall be voted on by the Promotion and Tenure Committee of the College.
